### **DETAILED ACTION**

1. This office action is in response to the amendment filed on 03/10/2009.
2. Claims 1, 6, 11, 13 and 16 are amended; claims 3, 12 and 17 are cancelled; and none of the claims are newly added. Therefore, claims 1-2, 4-11, 13-16 and 18-20 are currently pending in this application.

### ***Information Disclosure Statement***

3. The information disclosure statement (IDS) submitted on 12/11/2008 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

### **EXAMINER'S AMENDMENT**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
5. Authorization for this examiner's amendment was given in a telephone interview with Eric Hiponia (Reg. No: 62,002) on 06/18/2009.
6. The application has been amended as follows:

#### **CLAIM 1 (Currently Amended):**

A method for optimizing an executable comprising:

~~migrating a plurality of objects from a first memory to a second memory, wherein migrating~~  
includes

determining a set objects, included in a plurality of objects, eligible for migration by identifying whether each objects of the plurality of objects that are not accessible from a plurality of multiple processors, and determining objects in an equivalence set of aliased objects in the plurality of that does not further include an object[[s,]] that is accessible from multiple processors;  
migrating the set of objects eligible for migration from a first memory to a second memory,  
wherein migrating includes  
determining ~~objects of the plurality of objects eligible for migration;~~  
changing residence of the set of objects determined to be eligible for migration, and  
changing accesses of the set of objects having their residence changed;  
determining alignment of the migrated ~~plurality set~~ of objects; and  
eliminating redundant initialization code of the ~~plurality set~~ of objects.

**CLAIM 6 (Currently Amended):**

A processing device comprising:

an optimizer to determine a set of variables, included in a plurality of variables, eligible for migration by identifying whether each variables of the plurality of variables that are not accessible from at least two multiple network processors, and determine variables in an equivalence set of aliased variables in the plurality of that does not further include a variable[[s]] that may be accessed by multiple network processors, change location of the set of variables that are determined to be eligible for migration, and migrate the ~~plurality set~~ of objects from an external memory of a network processing device to a plurality of registers coupled to a processor, the optimizer further to align and eliminate redundant initialization code of the ~~plurality set~~ of objects.

**CLAIM 11 (Currently Amended):**

An optimizer system for network processors comprising:

a processor,

a first memory coupled to the processor;

a display coupled to the processor;

a compiler to migrate a set of objects, included in a plurality of objects, from a second memory to a plurality of indexed registers in a network processor, the compiler further to align and eliminate redundant initialization code of the ~~plurality migrated set~~ of objects;

a ~~first~~ determiner to determine the set of objects eligible for migration by identifying whether ~~each~~

objects of the plurality of objects that are not accessible from a plurality of multiple processors in a network device, ~~and a second determiner to determine~~

objects in an equivalence set of aliased objects in the plurality of that does not further include an object[[s]] that may be accessed by multiple processors in a network device

~~a third determiner to determine objects of the plurality of objects eligible for migration;~~  
a migrator to change residence of the set of objects determined to be eligible for migration; and  
an accessor to change accesses of the set of objects having their residence changed.

**CLAIM 16 (Currently Amended):**

A machine-readable storage medium containing instructions that, when executed, cause a machine to:

determine a set of variables, included in a plurality of variables, eligible for migration by ~~identifying whether each~~

variables of the plurality of variables that are not accessible from at least two multiple network processors[[:]], ~~and determine~~

variables in an equivalence set of aliased variables in the plurality of that does not further include a variable[[s]] that may be accessed by multiple network processors;  
change location of the set of variables that are determined to be eligible for migration;  
migrate the plurality set of variables from a first memory to a plurality of indexed registers;  
align the migrated plurality set of variables; and  
eliminate redundant initializations to a base address register.

### ***Allowable Subject Matter***

7. Claims 1-2, 4-11, 13-16 and 18-20 are allowed; and they are renumbered as 1-17, respectively.

### ***REASONS FOR ALLOWANCE***

8. The following is an examiner's statement of reasons for allowance:

The prior arts of record do not teach nor suggest, either alone or in combination, **all** the limitations of the amended claims of the current invention (renumbered claims 1, 5, 10 and 14); particularly about determining a set of objects eligible for migration; and migrating the set of objects determined to be eligible for migration.

Renumbered claims 2-4, 6-9, 11-13 and 15-17 further limit the allowable independent claims. These claims are therefore allowable for the same reason as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HETUL PATEL whose telephone number is (571)272-4184. The examiner can normally be reached on 8:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matt Kim can be reached on 571-272-4182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
